

Democratizing Metagenomic Testing

IDbyDNA's mission

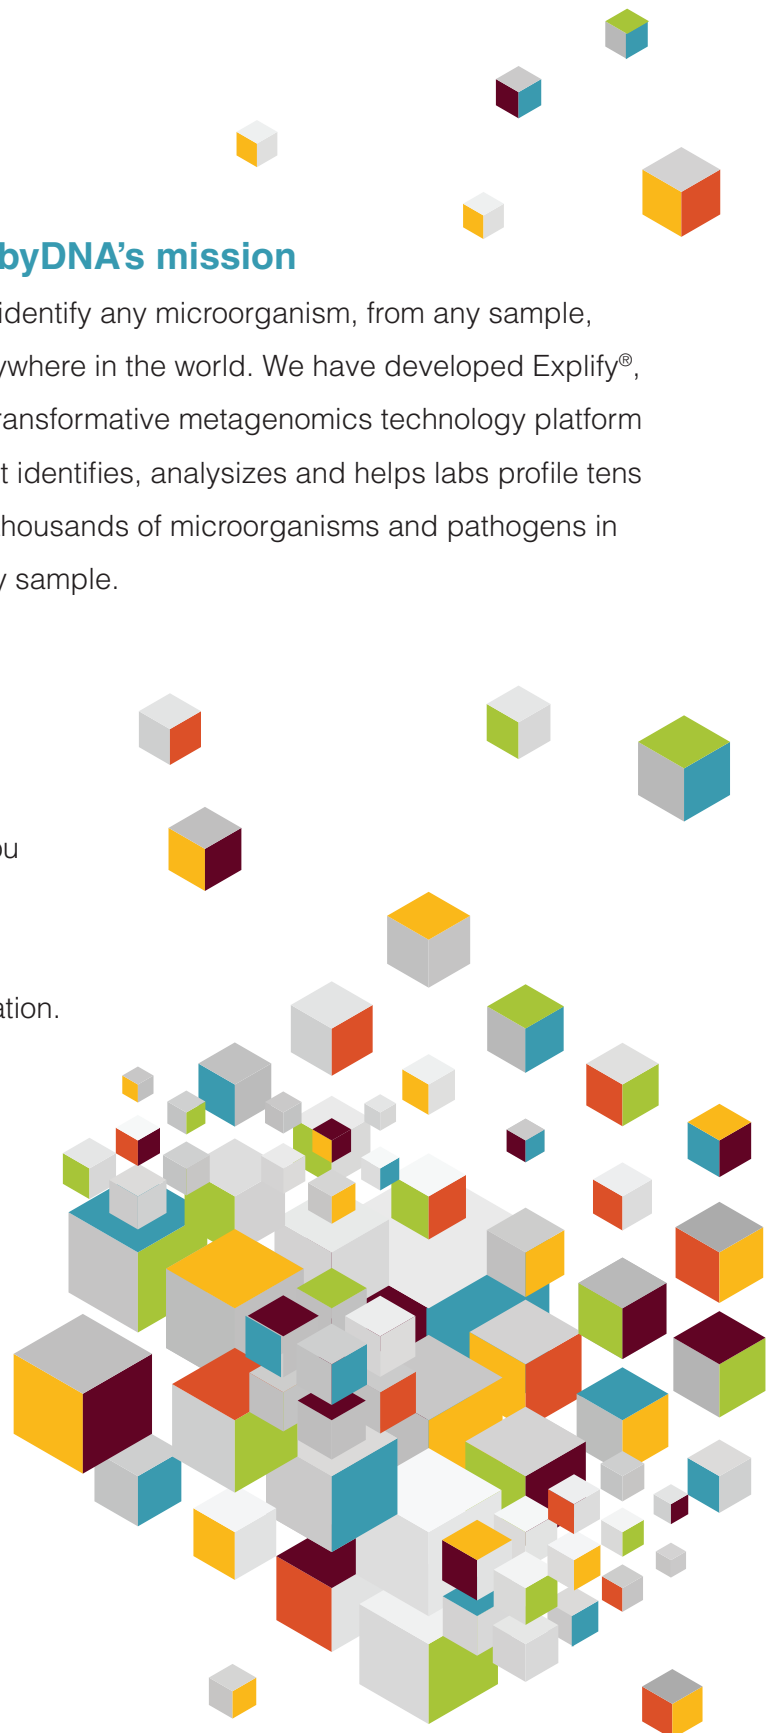

To identify any microorganism, from any sample, anywhere in the world. We have developed Explify®, a transformative metagenomics technology platform that identifies, analyzes and helps labs profile tens of thousands of microorganisms and pathogens in any sample.

Explify Platform

Our Explify Platform offers validated, accessible pathogen identification information, delivered to you ready to use and apply. Using IDbyDNA's Explify Platform, you can quickly provide physicians with robust, personalized and clinically relevant information.

High-quality, actionable results

The Explify Platform provides laboratories with unbiased, comprehensive, NGS-based microorganism identification, detection of genetic markers of anti-microbial resistance, and pathogen quantification. The Explify Results Portal enables easy-to-use, interactive review of sequencing data for organism identification together with a comprehensive summary quality metrics, removing barriers for analysis and interpretation of NGS data.

Identifies more than 50,000
microorganisms and over 3,000
known common and rare pathogens

Explicy Platform utilizes proprietary databases of curated DNA and RNA reference sequences to identify: 35,000+ viruses, 13,000+ bacteria, 4,000+ fungi, 150+ parasites.

Expanding Pathogen Identification and Analysis with Metagenomics

We are revolutionizing microbial detection to solve problems not addressable with current conventional testing. We have built a robust and tested database and streamlined metagenomic analysis to remove the noise and provide you with the actionable, accessible data you need.

IDbyDNA collaborates with ~50 industry partners from around the world, including large clinical reference labs, university and health system labs, biopharmaceutical companies, and government agencies.

MANAGEMENT TEAM

Guochun Liao, PhD, MBA
Founder, President &
Chief Executive Officer

Robert Schlberg, MD, PhD
Founder, Chief Medical Officer

Mark Yandell, PhD
Founder, Chief Scientific Officer

Jeffery A. Field, M.S., MBA
Chief Commercial Officer

BOARD OF DIRECTORS

Guochun Liao, PhD, MBA
Founder, President &
Chief Executive Officer

Robert Schlberg, MD, PHD
Founder, Chief Medical Officer

Stuart Peterson, MBA
Senior Partner, ARTIS Ventures

ADVISORS

Carrie L. Byington, MD
UC Health

George Weinstock, PhD
Jackson Laboratory for
Genomic Medicine

Gene Myers, PhD
Max-Planck Society

Eddy Rubin, MD, PhD
Chief Scientific Officer
Metabiota

Steven Solzberg, PhD
